

## Policy statement

For over more than 20 years PFF Group specialises in the supply of total solutions for piping and valve projects. We offer high quality pipes, flanges, fittings and valves for the oil, gas, chemical, petrochemical industry and the energy sector. In addition to this, the PFF Group, delivers a range of bearings for application in a wide range of products, including wind turbines.

PFF Group aspires to achieve and maintain a solid position in the higher market segment. We want to prove ourselves within this market as a strategic business partner that distinguishes itself through its quality. The primary objective of our service is to meet the market demand for technical solutions and high quality products in order to forge a sustainable relationship with our customers. Moreover we consider the welfare and safety of our employees and preserving the environment as an important aspect of our company activities. This vision serves not only the interest of PFF Group but also an individual and civil interest.

To continuously meet the strict standards, laws, regulations and customer requirements PFF has set its methods into a management system based on the requirements of NEN-EN-ISO 9001, NEN-EN-ISO 14001, OHSAS 18001 and relevant law and regulation.

We strive to create an accident-free work environment by organising our business processes in such a way that maximum care can be given to the welfare and safety of our employees and third parties. This way we try to prevent or minimize incidents, accidents and environmental pollution. Targets for health & safety, the environment and quality are set every year. Internal and external audits are underlying a continuous improvement process.

PFF management is responsible for implementing above stated policy and to provide the necessary resources. The employees of PFF Group will share the responsibility to fulfil this policy.

The management of PFF expresses their confidence in every employee to support this policy and that they will act and perform accordingly.

Feb 2012,

Group director  
Richard Cornelissen
